

Fusebox: Methodology And Techniques

Would you try to build a house without sitting down and deciding how many rooms you need and where they should be? Would you try to start construction without a blueprint? No. So, why would you try to build an application without using the best specification and design techniques available?

The Fusebox architecture is the collaborative research result of over 200 professional web developers. The result is a simple yet elegant structure that will work in any web application. This edition looks at how to apply this structure to applications in **Altaire™ ColdFusion®**.

Come join us as Steve Nelson, one of the creators of Fusebox, and Craig Girard, a leading programmer in the methodology, show you how Fusebox can make YOUR life easier by increasing teamwork efficiency, boosting productivity and radically reducing the time it takes to build ANY web application.

INSIDE:

- The Ten Key Skills that make a Five-Day Fusebox Developer (FD)
- An Introduction to iUseML
- An Overview of the Fusebox (by Hal Helms)

A JM Publishers, Inc. production for Fusion Authority, Inc.
